About Me

A dedicated Data Analyst with extensive experience in B2B and B2C organizations, passionate about turning complex data into clear and actionable business insights. Specialized in building impactful BI dashboards, defining KPIs, analyzing user behavior to improve customer experience and leveraging Generative AI tools (Gemini, Claude, Perplexity) to optimize SQL queries and data workflows.

Proficient in SQL (Google BigQuery), BI tools (Tableau, Power BI) and knowledgeable in Python.

A collaborative team player who works closely with cross-functional teams to provide meaningful insights and data-driven recommendations that guide strategic decisions and help organizations achieve their goals.
